

题目

- ◆ 如何识别浏览器的类型
- ◆ 分析拆解 url 各个部分

知识点

- ◆ navigator
- ◆ history
- ◆ screen
- ◆ location

navigator 和 screen

```
// navigator
const ua = navigator.userAgent
const isChrome = ua.indexOf('Chrome')
console.log(isChrome)

// screen
console.log(screen.width)
console.log(screen.height)
```

location 和 history

```
// location
console.log(location.href)
console.log(location.protocol) // 'http:' 'https:'
console.log(location.pathname) // '/learn/199'
console.log(location.search)
console.log(location.hash)

// history
history.back()
history.forward()
```

Chrome browser window showing the course page for "前端JavaScript" (Front-end JavaScript) on the imooc.com website. The page displays a price of ¥149.00 and a course introduction. The console shows the following output:

```
> 'https://coding.imooc.com/class/chapter/115.html#Anchor'
< "https://coding.imooc.com/class/chapter/115.html#Anchor"
> location.href
< "https://coding.imooc.com/class/chapter/115.html#Anchor"
> location.protocol
< "https:"
> location.host
< "coding.imooc.com"
> location.search
< ""
>
```
